Executive Memo: Customer Support Insights & Optimization

To: Priya Raman, Head of Customer Experience, Vireo Audio
From: Support Analytics & Operations Consultant
Date: September 30, 2026
Subject: 18-Month Support Ticket Analysis, Weekly Digest Tool, and Operational Efficiency Goal

---

1. Executive Summary

Over the past 18 months (January 2025 through June 2026), Vireo Audio's support desk handled **12,528 support tickets** across chat, email, voice, and social channels in Bengaluru and Indore. While your team successfully resolved or closed over 94% of these inquiries, our analysis of historical closing notes and metadata uncovers significant operational friction—specifically regarding delivery bottlenecks, payment gateway errors, and costly inter-team hand-offs.
To solve your visibility challenge, we have built a lightweight, automated Python tool that instantly compiles a **Weekly Complaint Digest** and a **Tier-Filtered Agent Leaderboard** directly from your raw helpdesk exports.

2. Weekly Complaint Digest: What Are Customers Saying?

Grouping customer opening messages by week and intake category reveals clear operational pain points that drive repeat contacts:

- **Delivery & Shipping:** Consistently the highest volume driver week after week (peaking at 44–52 tickets per week), indicating logistics or courier tracking visibility issues.
- **Billing & Payments:** A major source of friction closely tied to checkout anomalies and duplicate charge complaints.

Our tool automatically surfaces these weekly spikes so leadership can address root causes upstream rather than handling them reactively in the support queue.

3. Agent Performance Leaderboard (Tier 1 Frontline)

In accordance with Vireo's operating policy, Tier 2 technical and warranty agents are measured on resolution time rather than raw volume. Below is the performance leaderboard for **Tier 1 Frontline agents** ranked by total tickets successfully resolved/closed across the evaluation period:

Rank	Agent Name	Site	Team	Tickets Closed
1	Diya Singh	Bengaluru	Billing	735
2	Vivaan Sethi	Bengaluru	Returns Desk	529
3	Geeta Rathore	Indore	Logistics	502
4	Aishwarya Agarwal	Indore	Logistics	475
5	Tarun Pereira	Bengaluru	Logistics	418

4. Quantified Business Goal & Financial Impact

According to Vireo's support policy (Section 4), every internal team transfer incurs an administrative re-handling cost of **₹305 per hand-off**. Across our historical window, tickets generated **1,241 unnecessary inter-team transfers**, costing the company **₹378,505** in hidden operational waste.

Proposed Business Goal:

*Cut internal team transfer volume by 25% (reducing hand-offs from ~69 to ~52 per month), lowering administrative overhead and saving approximately **₹95,000 per quarter (₹3.80 Lakhs annualized)** in support operations cost.*
